

IMAGINE A BATTLEFIELD WHERE THE
ENEMY CAN'T SEE YOU.

Currently, recon drones only observe,
lacking the ability to actively support
troops...

But how do we protect our
own drones?

SMART LASER SYSTEM

01

SEARCH AND DESTROY

Identify and target critical components of enemy vehicles, ranging from ISR/FPV drone cameras to tank periscopes.

02

STRONG COST EFFECTIVENESS

through reusability and reliability, outperforming single-use solutions.

FEATURES

GROUND & AIR SUPPORT

Deter enemy attacks by motorized forces, infantry, and drones from the ground, sea, and air.

AERIAL SUPERIORITY

Go beyond reconnaissance and turn them into versatile, precision-targeting assets.

DUAL-USE APPLICATIONS

Protect commercial assets and ships by deterring armed assailants such as pirates.

COMMERCIALIZATION

PARTNERSHIPS

Leveraging existing partnerships and cultivating new ones to facilitate real-world testing.

DUAL-USE MARKET STRATEGY

We target both defense operations and public safety or security sectors to diversify our market reach and maximize impact.
